NOTE.

In accordance with the recommendation of the Departmental Committee on Trade records (Cd. 4345 of 1908), Imports are throughout the Tables in this Volume credited to the Countries from which they were consigned to the United Kingdom, and Exports to the Countries of final destination so far as known. The Tables thus correspond to those which have been given in the Supplements to the Annual Statements for the years 1904 to 1908, and differ from those given in Volumes I. and II. of the issues of the Annual Statement for 1908 and previous years in the case of certain important countries, notably Germany, the Netherlands, and Belgium, while the trade between the United Kingdom and countries without a seaboard is separately stated, instead of being included with that of the countries in which are situated the ports through which it passed in transit.

Volume III. of the Annual Statement will contain a classification on the basis followed in Volumes I. and II. of the Annual Statement for 1908 and earlier years.

INTRODUCTION TO VOLUME II.

The Tables in this, as in the preceding Volume, give information for each of the years 1908 to 1912.* and, in all that relates to the countries from which goods were imported or to which they were exported, are based on the records of countries of consignment, not, as in the corresponding volumes for 1908 and previous years, on that of countries of shipment. These details correspond, therefore, to those supplied in the Supplementary Volumes to the Annual Statement for the years 1904 to 1908.

The **Abstract Tables** given in Section I. of this volume (pp. 1 to 66) consist in the main of summaries of the information with regard to the trade with each country and colony, and the trade of each Port, which is given in detail in Sections II. and III. In Table 1 there is shown the total value of the merchandise imported into the United Kingdom which was consigned from each country and colony, and, in italic type, the value of such merchandise retained in the United Kingdom. The latter, as was explained in the Introduction to Volume I., is arrived at by deducting from the imports in each year from each country or colony the value of the goods exported in the same year which had previously been imported as consignments from that country or colony. Inasmuch as such re-exports do not in all cases consist of goods imported in the same calendar year, and there is reason to believe that the statements of exporters as to the country whence the goods were originally consigned differ in some instances from the statements of the original importers, the results can only show approximately the values of the goods retained out of the imports of each year. Table 2 gives the total values of the exports of the produce and manufactures of the United Kingdom, and of Foreign and Colonial Merchandise, to each country and colony.

In Tables 3 to 6 there is given for each of the years 1908 to 1912 a statement of the total values of the Imports, Exports of United Kingdom produce and manufactures, and Exports of Foreign and Colonial merchandise, from or to the United Kingdom to or from each country and colony, subdivided into the four classes:—I. Food, Drink and Tobacco, II. Raw Materials and articles mainly unmanufactured, III. Articles wholly or mainly manufactured, and IV. Miscellaneous and unclassified, including Parcels Post. This classification of the trade with each country and colony cannot be given for years previous to 1908. Table 3 also shows the value of the articles under each of these classes retained in the United Kingdom.

Table 7 shows the total quantities and value of articles of Foreign and Colonial Merchandise that were retained in the United Kingdom.

Table 8 shows the total value of imports, exports of produce and manufactures of the United Kingdom, and exports of foreign and colonial merchandise, at each Port of the United Kingdom.

Detailed Tables.—Tables 9 and 10 in Sections II. and III. make up the bulk of the Volume. These statements show the quantities and values of the principal and other articles of merchandise imported and exported (*a*) at each Port of the United Kingdom, and (*b*) in trade with each Foreign Country and British Possession, exports of the Produce and Manufactures of the United Kingdom and exports of Foreign and Colonial Merchandise being separately distinguished. The articles shown in the case of each Principal Foreign Country and British Possession have been grouped this year, for the first time, so as to show the Principal and other articles comprised in each of the four main classes:—Food, etc., Raw Materials, etc., Articles Wholly Manufactured, etc., and Miscellaneous. In addition to the imports of each specified article, the values and, where these are distinguished, the quantities retained in the United Kingdom are also stated.

In Table 9, relating to the trade of each Port, the Ports are arranged alphabetically under the four divisions of "England and Wales," "Isle of Man," "Scotland," and "Ireland." The Countries in Table 10 (Trade with each Country) are arranged in two divisions, one including Foreign Countries, the other British Possessions and Protectorates. Within these divisions, however, the arrangement is geographical, except that the Colonial Possessions of Foreign Countries are placed immediately after their respective mother countries. In both divisions European Countries are given first, and these are followed by Africa, Asia, Australasia and America in that order.

* Except the Tables relating to goods remaining in bonded warehouses, as to which information for 1910 is not complete.

OCT 29 1913 Stechert

18--II Wt. 20507. 1,750. 8/13. Wy. & S., Ltd. Gp. 40. Sch. 3.

The information as regards ports shows the quantities and values of the principal articles of merchandise entered for export or cleared for import by the Customs at each port. Imported goods, though landed at the ports to which they are thus accredited, may afterwards be carried in coasting vessels to other ports before passing into consumption. Thus these Port Returns are not an exact indication of the imports and exports passing through each port.

Transhipments under Bond, which are dealt with in Section IV. (Tables 11 to 15, pp. 449 to 471), include all goods, whether dutiable or free, removed from a ship in one port, and carried under bond to another port for reshipment, or removed under the same conditions from one ship to another in the same port. The system must be distinguished from that under which dutiable goods are stored in bonded warehouses and afterwards re-exported without paying duty. Such goods are, whilst goods transhipped under bond are not, included in the general Tables of imports and of Foreign and Colonial exports.

The Section includes two detailed Tables, Nos. 14 and 15, giving, respectively, by countries from and to which consigned, and by ports in the United Kingdom, the quantities and values of each principal dutiable article transhipped under bond. Other articles are not individually distinguished, their total value only being given.

Of the remaining Tables in this Section, Nos. 12 and 13 are Summary Tables, giving the same particulars as in Table No. 14, but omitting in the one case the distinction of articles, and in the other the distinction of countries from and to which consigned, whilst No. 11 gives the total value of the transhipments under bond as a whole.

Customs Revenue.—The two Tables comprised in Section V., viz., Tables 16 and 17, give particulars of the gross amount of Customs Revenue received (*a*) at each Port and certain inland towns, and (*b*) in respect of each principal article. The Tables include, besides the Duties, the other receipts incidental to the clearance of the goods; that is to say, the charges for bottling spirits in bond, and moneys deposited but not appropriated to goods. Drawbacks and allowances for over-entries, etc., have not been deducted.

Stocks in, and Free Deliveries from, Bonded Warehouses are shown in Section VI. Table 19 shows in detail the quantities of the principal imported dutiable articles which remained in warehouse or were entered to be warehoused at the end of each of the years 1908–1912, except 1910, in each of the principal bonding ports or places in the country, whilst similar information but without distinction of ports, for the end of each of the years 1908–1912, is given in the Abstract Table No. 18. The information with regard to the stocks on the 31st December, 1910, is not available for particular ports, and is partly estimated as regards the totals for the United Kingdom. The Stocks in Bond on the 31st December, 1912, are, however, given in detail.

The remaining Table in this Section, No. 20, gives the quantities of each of the principal articles of merchandise delivered free of duty from bonded warehouses for the use of H.M. Navy and Army, and for stores of merchant vessels, respectively, during each of the years 1908–1912. These goods are not included in the account given in Vol. I. of goods entered for consumption.

Free Goods entered in Transit on Through Bills of Lading (other than Goods Transhipped under Bond).—These goods are, throughout these Volumes, included in the Tables with other goods imported and exported, but a separate account is taken of them, so far as they are separately entered, and certain of the figures are given in Section VII. Table No. 22 gives particulars of the quantity and value of the various articles of merchandise passing through the country, and Table No. 23 shows the value of the merchandise in transit consigned from and to each Foreign Country and each British Possession and Protectorate. The total value of such merchandise for each port is given in an Abstract Table, No. 21.

A Supplement to the Annual Statement of Trade for 1912 will be issued, in which a classification of the Trade, on the basis followed in Vols. I. and II. of the Annual Statements for 1908 and earlier years, will be furnished for the purpose of comparison with the Tables in those volumes.
